Subject: AECE - Submission ID: 5350 - ACCEPTED

Dear Natchpong Hatti,

You submitted a paper to AECE - www.aece.ro, with the following identification data:

Paper title: A New V2G Control Strategy for Load Factor Improvement Using Smoothing Technique
Paper ID: 5350

We are able to inform the submission was ACCEPTED for publication.

If there are some comments regarding your submission from our reviewers, you are kindly invited to review them and modify your paper accordingly.

Please add author(s) names information and complete affiliation(s) to the .DOC paper file. Be sure to double-check you followed the template available for downloading on the web-site. If not sure, simply download the template and copy/paste the paper content in the sections with no formatting information - 'Edit/Paste Special/Unformatted Text' sequence. Do not modify the styles in the template file, do not delete them and do not add more styles. Failing to comply with these rules will have as a result your paper not to be published.

Special attention has to be given to the references section. We publish in the on-line version permanent links (CrossRef, PubMed, Permalink, Handle, etc.) to the references. Inaccurate references may result in loss of linking information.

You may access your submission status here: <https://www.aece.ro/openconf/author/status.php>

Sincerely yours,

AECE Editorial Board
